---

**Summary:** IT Engineering student from Bosnia & Herzegovina . Passionate about open source software, artificial intelligence and cyber security. Experienced in working with Linux-based operating systems. Capable of programming in several languages. Decent theoretical knowledge in cyber security. Willing to relocate or work remotely.

**Experience:** Currently without any kind of formal experience.

**Formal education:** Bachelor of IT Engineering (in progress)  
eMPIRICA Brčko, Bosnia & Herzegovina 2013/2017 (expected)  
The work I programmed in my first year as a part of the curriculum is being advertised as the best one in my year by the collage itself (as stated [here](#)).  
Computer Technician  
Technical high school Brčko, Bosnia & Herzegovina 2009/2013  
My graduation thesis is being actively used in the school's administration.

**Certificates<sup>1</sup>:** Youthpass Certificate (for European Voluntary Service)  
European Union (Erasmus+ program) 2015.  
Introduction to Cybersecurity  
Cisco Networking Academy 2014.  
Malicious Software and its Underground Economy: Two Sides to Every Story  
University of London (via Coursera) 2013.

**Personal projects:** Has The Turing Test Been Passed? <https://isturingtestpassed.github.io/>  
HTML5/CSS3, AI theory  
awesome-linux <http://git.io/vsaGw>  
Collecting Linux resources  
Sensitive Data Grabber <http://git.io/vsaGj>  
Collecting sensitive data on Windows machines

**Contributed to:** elementary OS Web design, localization, marketing <https://elementary.io>  
Tor Project Translating and managing translation <https://torproject.org>  
reddit Translating <https://reddit.com>

**Volunteering:** Opensource.com Community Moderator June 2015 – present
